last summer but will be tested in August which had the highest monthly exports in 2021. Exports this year have been more stable with the gap between the lowest and biggest month being 9,030 tonnes. In 2021, the gap was 20,542 tonnes with the peak month in August and the smallest month in December. Federally inspected slaughter numbers in were down -4.7% to 259,282 head in the month of July. Reduced production is expected to limit export volumes in the second half of the year.

Year-to-date beef exports of 295,238 tonnes valued at \$2.6 million were up 3% in volume and up 16% in value from last year. Export volumes have increased to the US (2%), Japan, (34%), Mexico (4%), South Korea (142%), Taiwan (39%), EU 27 (7%) and MENA (122%), but declined to Hong Kong and Macau (-48%), mainland China (-99%) and Southeast Asia (excl. Taiwan) (-17%).

Canadian Monthly Beef and Veal Exports

Primal Exports to Japan

While North America and Europe have been operating without covid restrictions for some time now, Japan is only just emerging from COVID-19 restrictions. Until June, borders were still Source: Statistics Canada and AAFC

closed to international travelers. Japanese consumers also still remain cautious in regard to food service. Overall, food inflation in Japan edged up to a seven-year high of 4.1% in May 2022 from 4.0% in the previous month. Imported retail beef prices were up 11% year-over-year in June while domestic prices for beef, pork and chicken remained about the same. Household beef consumption in July deceased 1.3% year-over-year; while pork and poultry consumption slightly increased, as consumers' shifted to cheaper pork and chicken. Even with these price hikes affecting demand for imported beef, as consumers choose to substitute for other meat or poultry products, demand for Canadian beef remains high and July saw the largest monthly volume this year.

Year-to-date July exports to Japan are 44,086 tonnes valued at \$356 million were up 33.6% in volume and up 55.2% in value. Japan is Canada's second biggest export customer after the United States and is responsible for 14.9% of Canada's exports.

The majority of beef demand in Japan stems from traditional dishes such as Korean BBQ and beef bowl cuisine. Korean BBQ consists of thinly sliced short plate and chuck cuts as well as several offal cuts including beef tongue, outside skirt, hanging tender, small and large intestine. In the popular winter beef bowls, cuts from the chuck primal are sliced thinly. This reflects quite obviously in the most popular primal demands. What many Canadians think of as guality beef cuts remain seen as luxury cuts in Japan and are consumed on more special occasions compared to cuts required for traditional cuisine.

CANADIAN BEEF TRADE

Flank and Plate were down 44% year-over-year due to the overstocking and appreciation of the USD against the Japanese yen. In Japan, flank, plate, and brisket all fit into a category called "bara". In July 2022, Bara volumes were down 7%. A decrease in flank and plate, but an increase in brisket could mean it is seen as an alternative to flank and plate.

Canada currently holds 8% of Japan's market share for imported beef tonnes YTD July 2022. Canada's biggest competitors are the United States (43% market share) and Australia (38%). Year-to date beef imports from Mexico were up 56% due to its competitive price. Mexico's average beef price was C\$5.83/kg, which was 22% lower than Canadian beef. Imports of New Zealand beef were up 15% (holding 5% market share) due to being a strong alternative to Australian product.
